DETAILED ACTION

1) Acknowledgement is made of Amendment received 6/1/2004. Applicants amend claims 6-8, 10-11, 14-16, 20, cancel claims 1-5, 9, 12-13, 17-19, and offer new claims 21-22, for consideration.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2) Claim 11 provides for the use of glass types produced by the process, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced. See MPEP 2173.05(q).

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3) Claim 11 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153

Art Unit: 1731

USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F.

Supp. 131, 149 USPQ 475 (D.D.C. 1966). See MPEP 2173.05(q).

Allowable Subject Matter

- 4) Claims 6-8, 10, 14-16, 20-22, are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for indicating allowable subject matter is that the cited prior art does not show a process for making glasses highly trasmissive in the UV range, where in said process the melting materials on the melt surface are uniformly intermixed and sub-mixed into the melt and the space above the melt surface has a temperature in the range claimed (claim 21).

Response to Amendment

- 5) Revised Figures 1 and 2 are accepted.
- 6) Specification and Abstract corrections are accepted.
- 7) Claims 5-11, 14-20, rejections under 35 U.S.C. 112, second paragraph, are withdrawn in view of amended and cancelled claims.
